30 Day program offer

The InvestSourceInc.com provides a unique combination of information delivery tools in a feature-rich environment, allowing you to control your message and leverage the most current communications technologies. You can deliver your company's message via RSS feeds and SMS messaging, display multimedia content including video and audio, upload filings and company reports, and keep in direct contact with shareholders and potential investors with our Investors' Q & A. Nowhere else can you find such a robust platform with so many features at such a tremendous price.

You have built a healthy, vital, growing business. You decided to test the waters of the public markets in order to take advantage of all of the options and benefits of being publicly traded. However, you soon discovered that while you know how to grow your business better than anyone, being listed on a public exchange requires a host of tasks and details detract from your ability to do what you do best: run your company the way that only you know how.

Are you looking for IR solutions, but don't have the resources to handle all your tasks in house? Can't afford an expensive full-time consultant?

InvestSource Communications now introduces the InvestSource Bundle, a package of our most popular services designed to allow our clients to take advantage of the widest possible range of investor relations/communications services at the lowest possible cost. Each one of these services is available on an individual basis, but by combining them, we are able to enhance their cumulative effect and also bring them together at a price point that makes the most sense to you. **Our introductory 30-day Bundle includes:**

- Two-Page Company Profile, composed by a professional ISC staff writer and posted on the ISC website
- Calendar of Events delivered at the start of the program that allows you to track the progress of your program
- Placement in "The Source," the ISC proprietary newsletter distributed to the ISC database of subscribers, telling the story of your company in a compelling narrative
- Compilation of a customized database of professional media contacts, delivered to you in an electronic format for your future use
- Dissemination of company information to the media contact database
- Audio interview on CEOCorner, "*The Fastest 60 Seconds in the Small-Cap Market*," the ISC in-house audio program; the audio file will be edited, delivered to you for your approval and posted on the ISC website
- Audio Interview with an ISC corporate partner
- Verification of Client information on financial web portals (ex., Yahoo! Finance, Pinksheets.com, etc.) to ensure that all your basic data is current, complete and correct
- National Press release distribution at a fixed rate of \$300/release (400 word max, \$70 per 100 words above max) for the duration of the program, if desired
- Press release enhancements (news driven) to reinforce the message of your news and to drive new eyes to the latest developments of your company

This entire 30-day InvestSource Bundle is available at an introductory price that won't last long! Call an ISC representative today for details.
